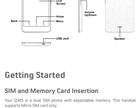
Understand Your Phone

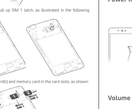


Getting Started

SIM and Memory Card Insertion

Your Q345 is a dual SIM phone with expandable memory. This handset supports Micro SIM card only.

Power off your device and keep SIM/memory card insertion/removal and insert the card(s) in the slots correctly.

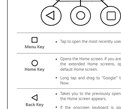


Please keep the SIM card out of the reach of children.

Switch off your phone and remove the rear cover, as illustrated below.

Slide right and pull up SIM 1 card, as illustrated in the following image.

Insert the SIM card(s) and memory card in the card slots, as shown below.



The card and the contacts are vulnerable to damage due to scratching or bending. Therefore, be careful when inserting or removing the cards.

Use only compatible memory cards with this device. Incompatible memory cards may damage the card or the device and corrupt the data stored in the card.

Handset Keys

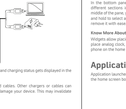
Power Key

- **Turn On** - Press the Power key for 3-4 seconds.
- **Wake up the Screen** - Firmly press the Power key to wake up the screen or to turn off the screen.
- **Turn Off** - Wake up the screen first. Now, long press the Power key then tap "Power off" to turn off the phone.
- **Quick Options** - Wake up the screen first. Now, press the Power key for 2 seconds to view quick options.

Volume Keys

Adjust the in-call, media, and ringtone volume from the volume keys available on the right side of the device.

On Screen Keys



- Tap to open the most recently used applications.

- Opens the Home screen. If you are viewing any of the extended Home screens, opens the main default Home screen.
- Long tap and drag to "Google" to open Google Now.

- Takes you to the previously opened screen until the Home screen appears.
- If the on-screen keyboard is open, closes the keyboard.

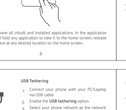
When turned on, the battery level and charging status gets displayed in the upper-right corner of the screen.

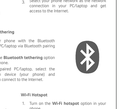
Use only Micromax chargers and cables. Other chargers or cables can cause the battery to explode or damage your device. This may invalidate your phone warranty.

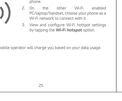
Charge the Battery

Before using the device for the first time, we recommend you to use the power adapter to fully charge the battery.

Connect the power adapter to the power outlet and the USB cable, as illustrated in the following image.







Tap to view all inbuilt and installed applications. In the application launcher, long tap and hold any application to take it to the home screen, release the hold to place at any desired location on the screen.

Home Screen

You can personalize your home screen with shortcut icons, widgets, and more. You can add shortcuts to change wallpaper and add widgets. Long tap on an empty space on the home screen. You can add customizations to your home screen. Long tap on any app icon on the home screen until a new screen appears. Your Q345 will allow you to have extended home screens that have some shortcut-widget placed on them. Swipe left or right on the home screen to view the extended home screen.

In the bottom pane, there will be five launcher icons for you to open different sections in the phone. Except the application launcher' in the middle, you can customize the other four launcher icons. Long tap on the icon and hold to select a launcher icon and then you can rearrange, change, or remove it with ease.

Know More About Widgets...

Widgets allow placing application shortcuts on your home screen. You can place amazing clock, your recent call logs, and other such sections of your phone on the home page and access them directly!

Application Launcher

Application launcher or Application menu is available right in the middle of the home screen bottom pane.
